

Robbe FS 100

Product information

A compact, robust all-purpose servo offering 30 Ncm of torque, at a very reasonable price. Can be used in all areas of modelling. The output shaft runs in a plastic bush to absorb the radial forces. Wireless assembly technology for high vibration resistance.

Specification

Dimensions: 40.4 x 19.8 x 36.0 mm

Weight: 44,4 g

Operating voltage: 4.8 - 6.0 Volts

Nominal voltage: 4.80 Volts

Torque: 24.00 Ncm

Transit speed: 0.21 Sec/45° °

Nominal voltage: 6.00 Volts

Torque: 30.00 Ncm

Transit speed: 0.17 Sec/45
